

COBRA 2 AND COBRA 4 – STACKABLE LINE ARRAYS

The **DYNACORD COBRA** compact line array systems **COBRA-2** and **COBRA-4** are extremely compact, fast and easy to set up and extremely cost efficient. They provide line array performance in the type of situations where conventional, large format line arrays can offer no economically viable solution.

The extremely wide horizontal directivity of the **DYNACORD COBRA** compact line array systems (due to their generation of cylindrical sound waves) means they can provide coverage to large audience areas without the comb-filter-like effects that impair the sound quality of conventional horizontal clusters. The shallow and precisely defined vertical directivity, free from strong vertical 'side lobes', avoids the undesired radiation of sound towards ceiling and floor areas, eliminating to a large extent the interference produced by reflections.

Both COBRA systems feature a system cabling, that allows a fast and easy set-up from preconfigured amplifier racks. **COBRA-2** is biamped for smaller to medium size applications, while **COBRA-4** with it's dedicated **COBRA-4-FAR** and the **PWH** hornloaded subwoofer cabinet allows for concerts with audience of several thousands.

MODELS

Cobra-4-Far Active 3-way cabinet

- Active 3-Way Compact Line Array Far Cabinet
- 3-Driver HF Slot Waveguide
- 4-Driver Low-Distortion Mid-Range Line Array
- Easy Stacking and easy Flying
- Voice Coil Tracking Protection

Dynacord's COBRA-4-FAR is an active 3-Way cabinet for use as a far cabinet in compact line arrays and other demanding applications, where wide horizontal coverage, extremely low distortion and a low sensitivity against acoustic feedback are mandatory.

Cobra-4-Top
Active 3-way cabinet

- Active 3-Way Compact Line Array Nearfield Cabinet
- 4-Driver Low-Distortion Mid-Range Line Array
- Constant Directivity HF Horn
- Easy Stacking and easy Flying
- Voice Coil Tracking Protection

Dynacord's COBRA-4-TOP is an active 3-Way cabinet for use as a nearfield cabinet in compact line arrays and other demanding applications, where wide horizontal coverage, extremely low distortion and a low sensitivity against acoustic feedback are mandatory.

Cobra-Sub
Vented direct radiating cabinet

- High-Efficiency vented direct radiating Subwoofer
- 600W EVX 180B Transducer
- 30Hz — 170Hz (-10dB)
- Easy Stacking and easy Flying
- Voice Coil Tracking Protection

Dynacord's COBRA-SUB is a vented direct radiating cabinet, equipped with the high-power Electro-Voice EVX 180B 18" transducer.

**We carry 12 – Dynacord – Cobra Stackable Line Array High Pack Speakers
 and 16 - Dynacord – Cobra Subs in our inventory.**
